

# Industrial Machinery Appraisals

*Our specialization  
makes us different*

**Specialized in equipment appraisals  
for the Plastics, Beverages and  
Packaging industries**

# More Accurate and Reliable Appraisals

MachinePoint's technical expertise and unparalleled positioning in the used equipment markets give us a perspective on appraisals that other companies cannot match.

We specialize in valuations for industrial equipment in the plastics, beverages and packaging industries.

Our vast database of values ensures that we can accurately appraise your used industrial assets according to industry standards and real market value, not only accounting value. Our quality appraisals are fast and affordable.

**An appraisal from MachinePoint is an accurate, defensible valuation of machinery and equipment for your business.**

Our appraisers have more than 30 years of experience in the used industrial market. We buy and sell a large amount of used industrial assets every year, which keeps us on the cutting edge of appraisal values.

This expertise is coupled with our familiarity with the requirements of the Financial Services Industry.

**It is a report consistent with the Uniform Standards of Professional Appraisal Practice (USPAP).**

Our staff of appraisers includes many different high-end profiles, so you will be dealing with Expert Equipment Appraisers who specialize in industrial asset and machinery valuations.

**We elaborate industrial equipment appraisals for businesses worldwide!**

**Whether you need an appraisal for one machine or an entire facility, we have the ability, the staff and the expertise to perform at the highest level for you and your company.**

# Advantages of MachinePoint's Machinery and Equipment Appraisal Services

## Technical knowledge

Unlike most appraisers who have limited equipment knowledge, our equipment specialists have a detailed technical understanding allowing them to identify specifications and options that can have a significant impact on asset values. MachinePoint employs a worldwide team of senior equipment specialists with 10-30 years engineering or operations experience.

## Better pricing data

Most appraisers do not participate in the market, and are limited to publicly available information as they research asset values. By contrast, MachinePoint is in the market having unparalleled data and insight into asset values.

We have a database of historical purchase prices, we track the results of nearly every public auction in the industries we serve, and we track private party negotiated sales (which are invisible to most appraisers).

## Better market data

Through MachinePoint's enterprise and procurement programs, we have exclusive forward visibility of upcoming supply and demand. We know in advance where companies are investing, and where they are divesting, of assets. This allows us to forward project asset values and market trends with much greater accuracy than other appraisers.

MachinePoint's unique business model allows us to provide clients with the most accurate appraisals possible. MachinePoint's website, the largest website in the world dedicated to facilitating the purchase and sale of pre-owned equipment, gives us a wealth of comparative data to ensure your assets are accurately appraised.

Our internal equipment specialists are experts in the life cycles of the equipment they value, they adhere to the highest standards set in the appraisal industry.

By working with MachinePoint, you partner with a company that has stood as an industry leader for more than a decade. No matter what your situation is, our appraisal professionals will provide you with an accurate and timely appraisal report at a competitive cost.
